

San Miguel Corporation Environment Policy

San Miguel Corporation (SMC) believes in the value of *malasakit*. We are committed to doing what is right and to leading in nation-building by creating opportunities so that all can share in the rewards of sustainable development and prosperity.

SMC envisions a world of good, where our businesses foster a sustainable future that is good for the planet, good for people, and good for progress.

As a responsible steward of the environment, we commit to:

- Ensuring our environmental performance complies with applicable national laws and regulations;
- Supporting internationally recognized standards and voluntary initiatives designed to protect the environment;
- Adopting environmentally sound technologies and acceptable best practices in all of our operations to help reduce our environment footprint;
- Monitoring and regularly verifying our efficient use of resources to minimize greenhouse gas emissions and waste generation, optimize energy and water consumption, recover value from by-products, and incorporate these strategies when we build, construct, and renovate facilities;
- Using recycled materials where appropriate and promoting the transformation of waste of one business unit into a resource for another;
- Advocating environmental sustainability in day-to-day operations and conducting training to raise the commitment of our employees, suppliers, business partners, and the community at large; and
- Strengthening environmental sustainability through strict adherence to SMC's Environmental Management System.

As a **Sustainably Managed Conglomerate**, SMC is an avid advocate of environmental preservation.
